## 2. Errors and Removal

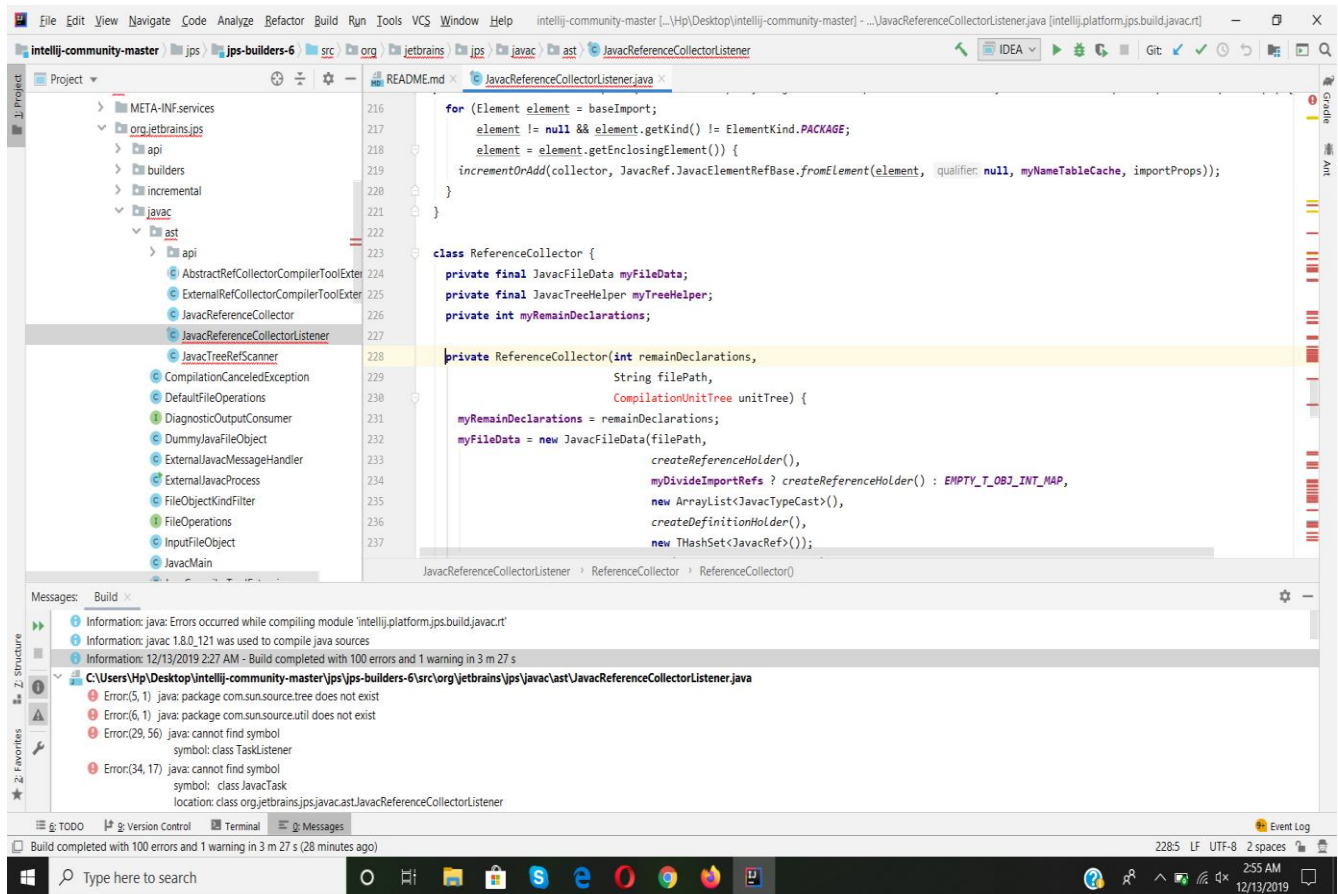

### 2.1 Java SDK Not Specify

### Removal:

- After installation of IntelliJ Community Edition, Open source code in it
- When open then it gives following errors that show in above picture
- I solve it by specifying the java 1.8 sdk to all files of source code

## 2.2 Library Missing Error

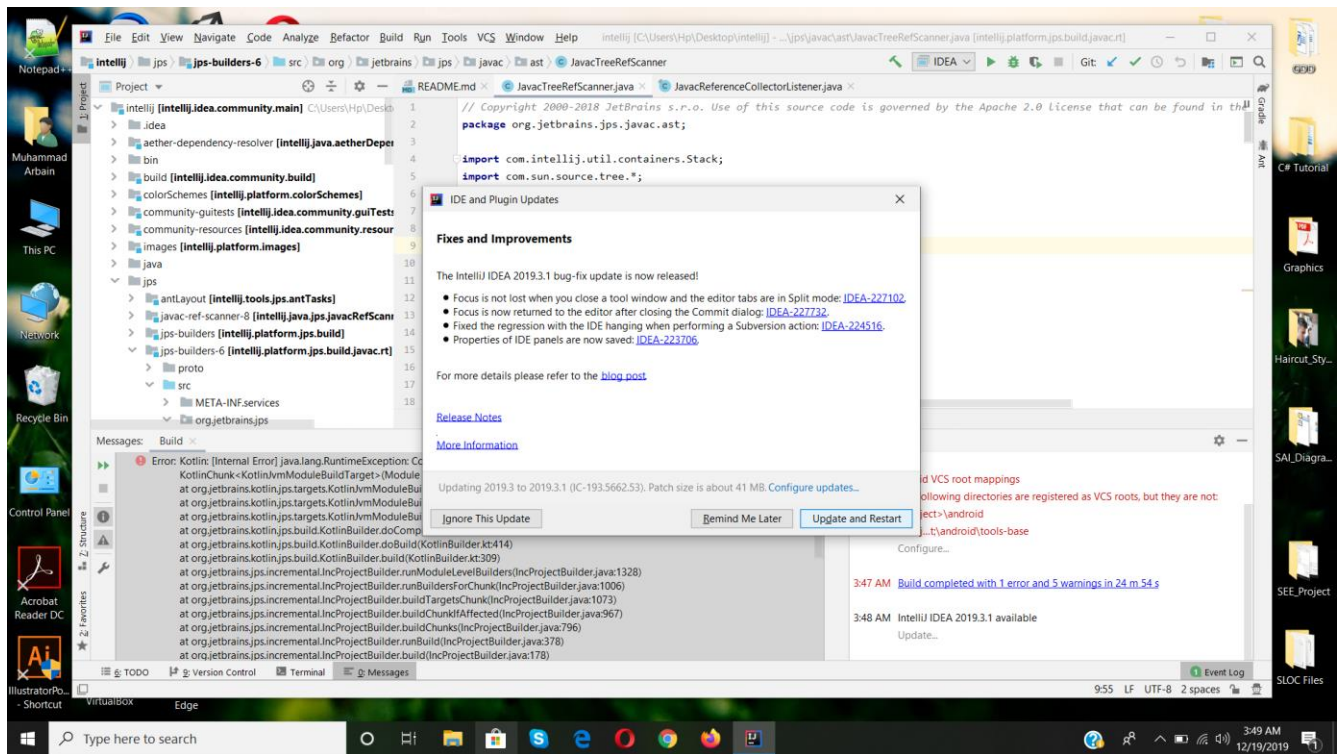

### Removal:

- After solve sdk specifying errors, when I start build under IDEA then again errors are occur
- These errors due to missing **Tools.jar** library
- Then I add library in Sdk module from project structure under class path

## 2.3 Build Successfully

After solving all errors, I build new version 2019.3.1 and my previous version was 2019.2.4
